

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ
جامعة كيري - كلية علوم الحاسوب وتقانة المعلومات
المستوى الثالث (هـ.برمجيات)
امتحان الدور الأول - ابريل 2025 م

التاريخ: 2025/5/15 م
الزمن: ثلاث ساعات

المادة: هندسة و تصميم تطبيقات الانترنت
استاذ المادة: د. أبوبكر طلحة

Answer all Questions (any question in each page)

Question (1) Define the following terms (10 Mark).

- ✓ a. Test case.
- ✓ b. Communication Protocols.
- ✓ c. Uniform Resource Locator (URL).
- ✓ d. Web Framework.
- ✓ e. Browser.

Question (2) Match the words in list (B) with those in list (A) (20 Mark).

List (B): Unique Numeric, Protocols, OSI layer, Internet, Client layer attack, Front-End framework, User Familiarity, Interaction Style, Network Topology, Firewall.

List (A)	List (B)
Transport layer	
Interconnected Networks	
Design Principles	
IP Address	
Direct Manipulation	
Web Framework	
Set of Rules	
Web application attacks	
Choke Point	
Mesh	

Question (3) Answer the following (30 Mark).

1. List of the types of Test Level? (5 Mark)
2. Give 4 example web applications attacks? (4 Mark)
3. List of features Node JS? (6 Mark)
4. What is the web applications framework functionalities? (4 Mark)
5. What is GUI characteristics? (6 Mark)
6. What does the following stand for? (5 Mark)
 - a. W3C
 - b. GUI
 - c. SMTP
 - d. CGI
 - e. CSRF

Question (2) Indicate the true statement (T) and the false statement (F)

(20 Mark).

1. A collection of interconnected documents and other resources called Internet. T
2. Model View Controller is a design pattern created for developing applications specifically web applications. F
3. Each device connected to the internet has a unique numeric IP Address. T
4. Easy to learn and use is one of GUI disadvantages.
5. The vulnerability allows an attacker to force the browser to fraudulently execute application functionality. T
- 6. Analytical techniques are well not suited for an initial estimates of a web applications performance.
7. Fresh and relevant content is key of engaging your audience.
- 8. Stress testing mean how does system behave under normal / non extreme condition.
9. Everything inside Node JS runs in a single-thread. T
10. Information presentation is concerned with presenting system information to system users. T

Best Wishes...
